In this intrepid, groundbreaking book, Richard Sennett and Jonathan Cobb uncover and define a new form of class conflict in America—an internal conflict in the heart and mind of the blue-collar worker who measures his own value against those lives and occupations to which our society gives a special premium. The authors conclude that in the games of hierarchical respect, no class can emerge the victor; and that true egalitarianism can be achieved only by rediscovering diverse concepts of human dignity. Examining personal feelings in terms of a totality of human relations, and looking beyond the struggle for economic survival, *The Hidden Injuries of Class* takes an important step forward in the sociological critique of everyday life.

A rather difficult book. But I appreciate Sennett and Cobb's insistence on finding the bright side of humanity. What should be is not what is now.

The calculus of the material well -being to which both sides of this debate subscribe hinges on an historic assumption that between the world of culture and the realities of life for the masses there is an unbridgeable gulf.
