This is a shorthand outline for almost every word in the English language. The "GREGG

Shorthand Dictionary Simplified" is divided into two parts: Part I contains 26,098 words most commonly used in notation with their official shorthand outlines. Also included are words that are frequently used in such fields as medicine, law, engineering, chemistry, and many others. These words represent a large range of vocabulary, omitting derivatives that are not needed in shorthand. Part II contains 2,604 proper names and geographic expressions including a list of 72 commonly used abbreviations. This valuable reference should be part of the library of every shorthand writer.
