This timely series seeks to provide objective information about the new trade agenda and to encourage informed dialogue about the role of trade in development, particularly for the world's poorest countries. Poverty reduction is deemed to be a centerpiece of the Doha Development Agenda currently being negotiated under the auspices of the WTO. Yet there is considerable debate about the poverty impacts of such an agreement. Some are convinced it will increase poverty, while others are equally convinced that it will lead to poverty reduction. This book brings the best scientific methods to bear on this question, taking into account the specific characteristics embodied in the Doha Development Agenda.
