isbn:9780977411702

This book is a simple, practical, and effective step-by-step guide to achieving your financing goals in the least amount of time. Written for the small business owner, it teaches you everything about securing loans: choosing loans, applying for a loan, improving your chances of being approved for a loan, and learning everything you need to know about the loan approval process. As an added bonus, this book will help you determine when loans are not an appropriate source of financing, and provide you with inside knowledge on loan officers' expectations, preferences, and pet peeves.
