Almost 70 million Americans believe it is possible to communicate with the dead, and 42% of the population have even reported contact with the deceased, according to a CNN/USA Today/Gallup Poll and the National Opinion Research Council. Denice Jones is certainly convinced it's true--her youngest son, Michael, is tormented by demons and ghosts. In *The Other Side: The True Story of the Boy Who Sees Ghosts* (New Horizon Press, October 2000), Denice Jones recounts her true-life nightmare of how both good and demonic spirits visit her son and how the evil ones caused the terrified clan to move from house to house--only to be followed by the menacing specters.
