In September 1998, Michael J. Fox stunned the world by announcing he had been diagnosed with Parkinson's Disease - a degenerative neurological condition. In fact, he had been secretly fighting it for seven years. The worldwide response was staggering, particularly to him. Fortunately, he had accepted the diagnosis and by the time the public started grieving for him, he had stopped grieving for himself. Now, with the same passion, humor, and energy that Fox has invested in his dozens of performances over the last 18 years, he tells the story of his life, his career and his campaign to find a cure for Parkinson's.

Combining his trademark ironic sensibility and keen sense of the absurd, he recounts his life - from his childhood in a small town in western Canada to his meteoric rise in film and television which made him a worldwide celebrity. Most important, however, he writes of the last 10 years during which - with the unswerving support of his wife, family, and friends - he has dealt with his illness. He talks about what Parkinson's has given him - the chance to appreciate a wonderful life and career and the opportunity to help search for a cure and spread public awareness of the disease. He is a very lucky man indeed.

Michael J. Fox began his career as the lovable Alex P. Keaton, the star of the popular sitcom Family Ties . Since then his career has been a nonstop success story, with blockbuster movies like Back to the Future , The Secret of My Success, Doc Hollywood and most recently as the lead voice in the animated film Stuart Little. In the summer of 2001 he was the lead voice in Disney's Atlantis: The Lost Empire . Michael has won numerous awards, including four Golden Globes, four Emmy awards, two Screen Actors Guild Awards, GQ Man of the Year, and the People's Choice Award. He retired recently from his award-winning role on Spin City, where he portrayed Michael Flaherty, New York City's favorite deputy mayor.
