Brilliant, self-trained engineers, the Wright brothers had a unique blend of native talent, character and family experience that perfectly suited them to the task of invention, but left them ill-prepared to face a world of skeptics, rivals and officials. Using a treasure trove of Wright family correspondence and diaries, Tom Crouch weaves the story of the aeroplane's invention into the drama of a unique and unforgettable family. He shows exactly how and why these two obscure bachelors from Dayton, Ohio, were able to succeed where so many better-trained, better-financed rivals had failed.
