isbn:9780230019041

Leading scholars and policymakers reflect on current thinking in development economics and on what may happen during the next two decades. Covering the major themes in development in an accessible way, this original and authoritative contribution highlights new and emerging issues, and shows how research can improve our understanding of these important questions. As well as studying development economics in retrospect, the volume explores the current debates and challenges and looks forward at the problems that affect the global capacity to achieve the Millennium Development Goals.
