Recently there has been an increase in demand for European mutual funds and how their performance compares to other international mutual funds. This influential new book focuses on the changes in some countries regarding the new paradigm of international investing. The reader can compare the performances of a variety of mutual funds on an international basis. This essential new book is a collection of original papers on the mutual fund industry in various European countries, USA and New Zealand. Performance is assessed using new, innovative ideas and various models. It allows the reader to get a perspective and understanding of mutual funds on an international level.
