出版者:Springer Verlag

出版时间:2006-12

装帧:Pap

isbn:9780387481364

India is becoming the "global back office" to international supply chains. This book consists of peer-reviewed and invited papers with two primary goals: (1) Stimulate creative discussion between academic researchers and the practitioner IS community to improve the research and practice in the area. (2) Increase awareness of the problems and challenges faced by global enterprises that can be met with innovative decision support systems.
