Based on extensive research, Jingji Xue considers how economics, as a concept as well as an intellectual discipline, was introduced and developed in China. Paul B. Tresscott identifies the Chinese who studied economics in the West and evaluates their roles in teaching, research, and publication in China. In particular, he describes and examines the activities of Kang Youwei, Liang Qichao, Sun Yat-sen, and Yan Fu in transmitting and interpreting Western economics. The evolution of economics programs in leading Chinese universities is also discussed.

作者介绍:

Paul B. Tresscott taught economics in the U.S. and in China. He was Chair of Economics at Kenyon College and Director of Graduate Studies (Economics) at Southern Illinois University. He is now Professor Emeritus of Economics at SIU.
