isbn:9780444530271

This is the second in a new series of books on the economics of the airline industry. The series is comprised of a collection of original, cutting-edge, research papers from an international panel of distinguished contributors. Volume 2 focuses on topics related to the economics of airline institutions (i.e., airports, air traffic control, labor), operations and marketing. It provides an up-to-date collection of articles covering recent developments in the airline industry. It is written by an international panel of distinguished contributors.
