Advances in Quantitative Analysis of Finance and Accounting is an annual publication to disseminate developments in the quantitative analysis of finance and accounting. The publication is a forum for statistical and quantitative analyses of issues in finance and accounting as well as applications of quantitative methods to problems in financial management, financial accounting, and business management. The objective is to promote interaction between academic research in finance and accounting and applied research in the financial community and the accounting profession. The papers in this volume cover a wide range of topics including earnings management, management compensation, option theory and application, debt management and interest rate theory, and portfolio diversification.
