出版时间:1989-6

装帧:HRD

isbn:9780471503606

Successful futures and stock traders know that speculation—short-term investing—is the only way to make real money in the market. This guide shows how to win at trading on the futures stock markets by recognizing cyclical price trends, timing trades in accordance with key technical signals, tracking movements in or out of markets by various categories of investors, and other strategies. Pacelli shows you how to get started in futures trading, how to take advantage of markets dominated by large institutions, and how to enter and exit trades to guarantee the largest possible profits.
