Trade, Environment and Sustainable Development: A South Asian Perspective explores the linkages between the objectives of liberalised international trade, protection of the environment and sustainable development. It is an anthology of essays by leading experts, key government officials and political leaders from the South Asian region, supported by officials of the OECD, UNCTAD and non-governmental organisations. Trade, Environment and Sustainable Development outlines the concerns of the developing nations of the South Asian region about the impacts on their trade and development from the environmental policies of the North. A range of country case and sector studies are presented, along with analysis of key regional issues.
