isbn:9781402073397

"Cyber Policy and Economics in an Internet Age" is a collection of essays from some of the world's best-known experts on Internet public policy. It provides an accessible introduction to critical issues that policymakers, businesspeople, and the public will need to confront in coming years: universal access, appropriate content (pornography, free speech, cultural values), Internet broadcasting, intellectual property, Internet taxation, consumer protection, privacy, fair E-business competition, regulation of the Internet infrastructure, and more. This book is intended for the industry practitioner, analysts, and researchers. It would also be suitable for use in graduate and undergraduate courses, as well as by researchers.
