isbn:9780812694475

With so many options for investing, retirement planning, and home financing available, consumers need a thorough understanding of the concepts and terms underlying financial decisions. All the Math You Need to Get Rich will leave even the math phobic with a solid foundation in the mathematics behind mortgage and insurance payments, compound interest, stocks and mutual funds, cash flow, gambling, and risk-taking. Writing in a light-hearted and humorous style, Robert Hershey takes readers step by step through several real-life sample problems in each area. Organized for easy reference, this book provides the necessary tools to make informed decisions about financial investments.
