出版时间:2004-1

装帧:Pap

isbn:9780521016919

This is the first book to provide a systematic treatment of the economics of antitrust (or competition policy) in a global context. It draws on the literature of industrial organisation and on original analyses to deal with such important issues as cartels, joint-ventures, mergers, vertical contracts, predatory pricing, exclusionary practices, and price discrimination, and to formulate policy implications on these issues. The interaction between theory and practice is one of the main features of the book, which contains frequent references to competition policy cases and a few fully developed case studies. The treatment is written to appeal to practitioners and students, to lawyers and economists. It is not only a textbook in economics for first year graduate or advanced undergraduate courses, but also a book for all those who wish to understand competition issues in a clear and rigorous way. Exercises and some solved problems are provided.

难哭了

对我的研究来说非常好用的一本书

邂逅：2011-2012年第一学期Elena课堂； 旅程：2011.10.-2011.12.；
地点：图书馆、寝室； 我当初是怎么啃下这么厚一本书的orz...

梯度不错，简化从学术上来讲过分，但是我谢谢你。

a highly EU textbook again...

What I found useful is Chapter 1.4.2 Art 82: Abuse of a Dominant Position; Chapter 7 Predator, Monopolisation, and Other Abusive Practice. (mainly focus on Exclusive Practice)
