The 1990s were a decade of historical significance with numerous and remarkable

changes. It was also a time of considerable reforms that strengthened the policy framework in a large number of countries. Yet the resulting growth experiences of developing countries have been extremely varied and often below expectations. What have we learned from this experience? And how can these lessons be applied to the challenges we face in the new millennium? This book brings together the insights and experiences of some of the world's leading policymakers and global thought leaders, individuals who have had substantial influence on the policy reforms and development strategies in their native countries. Sharing their unique perspectives, these "practitioners of development" explain the reasons for the uneven outcomes of the 1990s and, with the benefit of hindsight, draw relevant lessons for the future. Essays by leading global economists cover a wide range of topics, from the Washington Consensus as a policy prescription for development to the successes and failures of post-Communist transition countries. Those interested in economics, political science, and international studies will find much to think about in this challenging collection.

同样是经济学家，决策者的所想所言就很不一样。序言亦不错。
