This book considers several aspects of the transformation of the former state socialist countries: social and economic outcomes; forces in the transformation process; problems of consolidation of the new regimes; and alternative scenarios. The book evaluates the course of transformation of state socialist societies. It focuses on economic change and its impact on inequality and health. Comparisons are made between the successful central European countries now members of the European Union with those of the former Soviet Union. There are detailed studies of the transformation of the (former) German Democratic Republic, Czech Republic, Russia, Belarus, Ukraine, as well as the impact on Poland. A feature of the book is the impact of the collapse of state socialism on countries of Asia and the Third World. Alternative scenarios are considered, with specific chapters on China, Cuba, and North Korea. The book contemplates the alternative types of society that might replace state socialism, particularly state capitalism and market socialism.
