The economic tipping point for the United States is no longer theoretical. It is a reality today. The country has gone from the world's largest creditor to its greatest debtor; the value of the dollar is sinking; domestic manufacturing is winding down – and these trends don't seem to be slowing. Peter Schiff casts a sharp, clear-sighted eye on these factors and explains what the possible effects may be and how investors can protect themselves. For more than a decade, Schiff has not only observed the U.S. economy, but also helped his clients reposition their portfolios to reflect his outlook. What he sees is a nation facing an economic storm brought on by growing federal, personal, and corporate debt, too-little savings, a declining dollar, and lack of domestic manufacturing.

Crash-Proof is an informed and informative warning of a looming period marked by sizeable tax hikes, loss of retirement benefits, double digit inflation, even – as happened recently in Argentina – the possible collapse of the middle class. However, Schiff does have a survival plan that can provide the protection that readers will need in the coming years.

## 评论

学了可汗学院的金融课再看这个通俗易懂很多，问题是，在一个通货膨胀的社会中，如果经济崩溃，买房不保值，储蓄不保值，买消费品更是浪费金钱，到底怎么办。

## 书评

I am eager to read this book, but I can't find it either on the Internet or bookstore. Is it available in China? If not, how can I get it?

Peter Schiff is one of the few vocal people that saw this big crash coming. His theme, which is to sell dollar, buy commodity and gold, however, proves not so crash proof so far. Maybe it just takes time.
