Losing Your Executive Director Without Losing Your Way is a practical guide for board members and executives who must guide their nonprofits through the difficult transition of replacing the key member of their organization and shows how to make this transition a positive event. The authors Carol Weisman and Richard I. Goldbaum—acclaimed experts on the topic of governance—explain how boards can bridge the gap between executive directors and learn to use the transition period as a strategic opportunity. Using this invaluable resource, board chairs and members will learn what they need to know to recruit and train the new executive director and help the ED take charge of the organization.
