This book offers an innovative approach to overcome the crisis of management in the face of complexity. The systems approach to management will help to develop the new kind of intelligent organizations so urgently needed. This approach is a powerful tool, grounded in organizational cybernetics and systems dynamics. The approach will allow managers and advanced students of management cope with organizational complexity in an effective way. The book is a source for improvement of any kind of organizations, private or public, non-profit, large or small. The systems approach, on which this book is grounded, makes this book different from many conventional books on organizations.
