Many believe that equality of opportunity will be achieved when the prospects of children no longer depend upon the wealth and education of their parents. The institution through which the link between child and parental prospects may be weakened is public education. Many also believe that democracy is the political institution that will bring about justice. This study, first published in 2006, asks whether democracy, modeled as competition between political parties that represent different interests in the polity, will result in educational funding policies that will, at least eventually, produce citizens who have equal capacities (human capital), thus breaking the link between family background and child prospects. In other words, will democracy engender, through the educational finance policies it produces, a state of equal opportunity in the long run?

书评

这本书写的不错，优点是模型运用方面，逻辑分析方面，缺点是缺乏实证。建议读，并且建议对这个领域感兴趣的读者了解一下作者近期的研究，或许会更有帮助。 谢谢
