出版者:McGraw-Hill College

出版时间:2004-6

装帧:Pap

isbn:9780072980721

"Excel Applications for Corporate Finance" teaches students how to build financial models in Excel to solve common corporate finance problems. The book comes packaged with a free Excel tutorial CD-ROM to brush up on their spreadsheet skills. The text helps students learn the intuition behind building the spreadsheets so that they

can apply it to other types of problems instead of only providing "cookbook" instructions on how to build it.
