出版者:Mariner Books

出版时间:2002-9

装帧:Paperback

isbn:9780618257348

The second volume of Jane Goodall's remarkable self-portrait in letters, *Beyond Innocence* details some of the eminent scientist's greatest triumphs and her deepest tragedies. It covers the years following the publication of her groundbreaking book *In the Shadow of Man*, which, along with her articles in *National Geographic*, made her famous. Goodall's candid letters recount major events in her life and research, including her astonishing discoveries about chimpanzee behavior, the birth and raising of her son, the breakup of her marriage to Hugo van Lawick, the kidnapping by guerrillas of a group of her students, her marriage to Derek Bryceson and his death, and her growing concern about the future of her beloved chimpanzees at Gombe and elsewhere in the world. *Beyond Innocence* tells how many of the dreams of Goodall's youth were shattered, but also how she changed from a rather private observer to a public crusader.
