Most discussions of the digital divide focus on the gap between African Americans and others when it comes to using, and benefiting from, the technological and business opportunities of the information age. Although many African Americans are locked out of the information revolution, others are an integral part of its development and progress. Barber profiles 26 of them here, engagingly and informatively blending biography with insight and analysis. Documenting history as it is being made, the book features achievers in all fields of relevant endeavor, including scientists, business leaders, power brokers, and community leaders. It is, however, not just about business success or technological progress. The African American "digerati" are solving one of the great social challenges of the 21st century: creating a black community that is prosperous in a society that has changed from being a land-based industrial society to a cyberspace-based information society.
