出版者:Capstone Pr Inc

出版时间:1999-1

装帧:SAL

isbn:9780736802222

"Baby Birds describes and illustrates the development of young robins from hatching to leaving the nest. The other three titles in the series present information on different types of birds. Readers examine various eggs, nests, and family groupings. The close picture-text matches in this series support early readers. This series explores and supports the standard "The Living Environment: Diversity of Life," as required by

Benchmarks for Science Literacy: Project 2061.
