isbn:9780618015108

What would you see if you sat at the edge of a tidepool, looked into the water and watched the changes taking place in this little world? What life would you discover there? In a charming hand-sized book, Anne Hunter illustrates the creatures that live in and around a tidepool, and describes each animal's characteristics and habits. The gorgeous artwork and simple sense of wonder will inspire children to explore their environment. Fans of Hunter's two books, WHAT'S IN THE POND? and WHAT'S UNDER THE LOG? will want to add this new title to their collection.
