isbn:9780873587488

Set to the traditional tune of "Over in the Meadow", Somewhere in the Ocean will teach young children much more than how to count from one to ten as they follow ocean-dwelling mothers and their offspring throughout their days. Complete with a

glossary, musical score, and numbers hidden in the illustrations, Somewhere in the Ocean introduces readers to an array of marine life -- from manatees and sea otters to jellyfish and sea horses -- in their natural habitat. Following the success of best-selling Way Out in the Desert this author/illustrator team has once again created a lively counting book.
