出版时间:2004-4

装帧:Pap

isbn:9780060588342

Using an innovative photographic method of displaying movement on the page that shows whole sequences of movement rather than step-by-step highlights, "Calligraphy: Easel-Does-It" makes understanding, learning and mastering the skills

involved in creating illuminated text easier and more enjoyable than ever. The flip-over, easel style format also means that its 8 projects can easily be mounted for viewing while you practice. The projects are designed to develop a range of styles, including Gothic, Renaissance, Celtic, Romanesque and Modern Revival. Within each project, a technique is introduced and its usage explained; then step-by-step pictures and captions guide the reader through every stroke. All of the materials and equipment needed for each project are listed within the project. A Gallery section provides inspiration for the beginning calligrapher and demonstrates, through examples by professional calligraphers, the range of effects that can be achieved.
