This book represents a partial reprinting of the classics 1980 publication. It is but a small review of the science of Zermatism realized by Szukalski since 1940. The drawings herein were chosen from over 40,000 illustrations made for the Zermatism oeuvre, representing, in particular, some of the most important subjects as Universal Pictograph, the Flood Scumline and Anthropolitical Motivations. This is the first book in 50 years to bring Szukalski's work to the light of the American public.
