The last few decades have witnessed an explosion in ideas and theories on art. Art itself has never been more popular, but much recent thinking remains inaccessible and difficult to use. This book assesses the work of leading thinkers (including artists) who are having a major impact on making, criticizing and interpreting art. Each entry, written by a leading international expert, presents a concise, critical appraisal of a thinker and their contribution to thought about art and its place in the wider cultural context. A guide to the key thinkers who shape today's world of art, this book is a vital reference for anyone interested in modern and contemporary art, its history, theory, philosophy and practice.
