出版者:Dover Pubns

出版时间:2007-2

装帧:Pap

isbn:9780486454634

Separated into two distinct sections — "Elements of Figure Drawing" and ""Drawing From the Figure" — this exhaustive reference features nearly 80 drawings, photos, and paintings. It covers every topic, from the basics of posing a model and choosing materials to measurement, action, median lines, foreshortening, and much more.
