In 1982, when he was four years old, Kamran Nazeer was enrolled in a special school alongside a dozen other children diagnosed with autism. Calling themselves the Idiots, these kids received care that was at the cutting edge of developmental psychology. Now a policy adviser in England, Kamran decides to visit four of his old classmates to find out the kind of lives that they are living now, how much they've been able to overcome--and what remains missing. Bringing to life the texture of autistic lives and the limitations that the condition presents, Nazeer also relates the ways in which those can be eased over time, and with the right treatment. Using his own experiences to examine such topics as the difficulties of language, conversation as performance, and

the politics of civility, "Send in the Idiots" is also a rare and provocative exploration of the way that people--all people--learn to think and feel. Written with unmatched insight and striking personal testimony, Kamran Nazeer's account is a stunning, invaluable, and utterly unique contribution to the literature of what makes us human.
