"Mapper of Mountains" follows the career of Dominion Land Surveyor Morrison Parsons Bridgland, who provided the first detailed maps of many regions of the

Canadian Rockies. Between 1902 and 1930, this unheralded alpinist perfected phototopographical techniques to compile a series of mountaintop photographs during summers of field work, and spent his winters collating them to provide the Canadian government and tourists and mountain climbers with accurate topographical maps. Bridgland was also a great climber and co-founder of the Alpine Club of Canada. "Mapper of Mountains" tells the story of the Rocky Mountain Repeat Photography Project, which studies the changes sustained in the Rockies, repeating the field work accomplished by Bridgland almost a century ago.
