装帧:Pap

isbn:9780415933049

'An authoritative work of modern history which is also a nail-biting page turner ...Dudley writes with an appealing blend of passion and honesty and his book is absolutely riveting.' - quotes Jon Lee Anderson, in "The New Yorker" 'Essential reading for anyone who wants to fully understand the causes of Latin America's longest-running civil war. A brave and unflinching book.' - says Joseph Contreras, in "Newsweek" Faced-paced and highly accessible, "Walking Ghosts" presents a window into one of the most fascinating and deadly conflicts of our time. Steven Dudley unpicks the complicated conflict between the Colombian government and FARC, the country's largest and most powerful guerrilla group. He focuses on the compelling stories of key actors - politicians, drug kingpins, revolutionaries and killers - in this struggle that has plagued Colombia for the past fifty years. Dudley has seen this war up close: dead bodies, paramilitaries, victims, guerrillas and survivors. He has witnessed political parties grappling for power by any means necessary, spoken to all sides and asked the tough questions to deliver this definitive new account.
