"The Power of Greed" recommends a shift away from the moralistic way we often go about doing international development. It says we can be too focused on our own ambitions for others and too unaware of what they're up to on their own behalf. It argues that the desperate and greedy behaviours of the poor and their oppressors are not the enemies of international development, but its potential allies. It also says we ought to resist taking sides in defence of the poor. Productive alliances between oppressed and oppressor are possible if the conditions are right. Furthermore, it says that we need to tie national institutional and economic strengthening measures to the creation of sustainable interest groups at the grassroots. Only they could be in a position to prevent greed and corruption at the top in a sustainable way. For these reasons, the book tries to get us to focus on doing more about the opportunity structure in the developing world and, for the rest, to rely on the opportunism of the population.
