Conservation and Sustainability in Historic Cities examines how the two key issues of urban conservation and sustainability relate to each other in the context of historic cities, and how they can be brought together in a common philosophy and practice that is mutually supportive. It sets out the theoretical and practical background to architectural conservation and how its perceived relevance and level of attainment can be extended when harnessed to wider agendas of sustainability and cultural identity. It tests the achievement of urban conservation through case studies from across Europe and elsewhere, assessing them against the sustainability agenda.

比较普及性的书吧。Conservation和Sustainability的关系是有提到，但总感觉点到为止，不痛不痒的。
