Written by practicing social workers and social work educators, this text analyses modern psychoanalytic and psychosocial approaches to social work, and relates them to current practices and values. Focusing on working with children and families, the text covers salient issues in social work practice, including risk assessment, dealing with parents with drug and alcohol problems, and supervision and management of emotional stress. Throughout the book there is an emphasis on the realities of frontline practice, and looking at what can realistically be achieved. It also addresses the research evidence for this approach. With psychoanalytic and psychosocial approaches becoming increasingly popular, this text will be a welcome addition for professionals, students and social work educators.
