This book uniquely integrates a large body of historical, philosophical, psychological,

and business models and methods as they relate to executive coaching and leadership development, for individuals, dyads, teams, and executive groups. What is executive wisdom, and how can it be developed through coaching? Executive wisdom emerges from a complex matrix of factors that affect an individual leader's thoughts, behavior, and emotions, including his or her organization, biopsychosocial systems, behavioral interfaces, internalized human wisdom system, external and internal challenges, and environment. It develops through the discernment, decision making, and executive action that leaders take in their daily lives. Synthesizing a rich array of concepts and processes, such as wisdom mapping, Kilburg deepens the reader's understanding of leadership performance and explains the causes and consequences of executive failure.
