出版时间:2006-6

装帧:Pap

isbn:9781593853457

Presenting state-of-the-art research from leading investigators, this volume examines the processes by which people understand their interpersonal experiences. Provided are fresh perspectives on how individuals glean social knowledge from past relationships and apply it in the here and now. Also explored are the effects of biases and expectancies about significant others on relationship satisfaction and personal well-being. Broad in scope, the book integrates findings from experimental social psychology with insights from developmental, personality, and clinical psychology.

Throughout, chapters strike an appropriate balance between theory and method, offering an understanding of the core issues involved as well as the tools needed to study them.
