isbn:9781593854706

Synthesizing the latest theory, research, and practices related to supporting early attachments, this volume provides a unique window into the major treatment and prevention approaches available today. Chapters address the theoretical and empirical bases of attachment interventions; explore the effects of attachment-related trauma and how they can be ameliorated; and describe a range of exemplary programs operating at the individual, family, and community levels. Throughout, the authors consider cross-cutting issues such as the core components of effective services and appropriate outcome measures for attachment interventions. Also discussed are policy implications, including how programs to enhance early child-caregiver relationships fit into broader health, social service, and early education systems.
