出版时间:2007-03-08

装帧:Hardcover

isbn:9781593854485

Attachment research has tremendous potential for helping clinicians understand what happens when parent-child bonds are disrupted, and what can be done to help. Yet there remains a large gap between theory and practice in this area. This book reviews state-of-the-art knowledge on attachment and translates it into practical guidelines for therapeutic work. Leading scientist-practitioners present innovative strategies for assessing and intervening in parent-child relationship problems; helping young children recover from maltreatment or trauma; and promoting healthy development in adoptive and foster families. Detailed case material in every chapter illustrates the applications of research-based concepts and tools in real-world clinical practice.
