Included with this book is a free copy of the "Therapist's Manual. Together, these two books provide a complete clinical framework for health professionals who wish to offer group psychosocial support to breast cancer patients. This package of resources focuses on training therapists to help group members cope with the diagnosis of breast cancer and its treatment through considering its impact on their lives, while also providing empirical validation for the program's techniques and providing a session-by-session set of guidelines for each module of the program.
