著者:Lubart, Todd I.

出版者:Amer Psychological Assn

出版时间:

装帧:HRD

isbn:9781557989710

This one-of-a kind volume brings together leading scholars in intelligence research to

present timely and forward-thinking perspectives. Each contributor builds upon past studies of intelligence and explores new ideas that differ radically from traditional notions about intelligence. Contributors also examine how intelligence changes over the lifespan, focusing on such issues as the importance of environmental context in determining intelligence and the importance of understanding how intelligence relates to other constructs like emotion and temperament.
