isbn:9780792373377

This eighth volume of the proceedings of the biennial conference of the International Society for Theoretical Psychology continues the Society's exploration of issues in the sciences of the mind. Covered topics include narrative studies, language and discourse, perspectives on cultural psychology, identity and subjectivity, critical history and post-modern debates about constructivism vs. realism. In short, the papers included in this volume present a concise summation of the state of theoretical psychology.
