出版者:Sage Pubns

出版时间:1999-6

装帧:HRD

isbn:9780761913900

This volume ranges widely over many examples of qualitative research in two main areas: families' resilient adaptation and creation of meaning in health related crises; and families' adjustment to unexpected life events and changes. The book represents the great diversity of approaches and variety of techniques used in qualitative research and in collecting and analyzing data.
