出版者:New Falcon Publications

出版时间:1990-06

装帧:Paperback

isbn:9781561840717

Throughout human history, thoughts, values and behaviors have been colored by language and the prevailing view of the universe. With the advent of Quantum Mechanics, relativity, non-Euclidean geometries, non-Aristotelian logic and General Semantics, the scientific view of the world has changed dramatically from just a few decades ago. Nonetheless, human thinking is still deeply rooted in the cosmology of the middle ages. Quantum Psychology is the book to change your way of perceiving yourself --- and the universe. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these --- and none. The book for the 21st Century, complete with exercises. Picks up where Prometheus Rising left off. Some say it's materialistic, others call it scientific and still others insist it's mystical. It is all of these --- and none. Second Revised Edition!

评论

从提出新问题及科普量子力学的角度上来说还是有些价值的，但是还是太浅，，谈不上什么研究著作吧！倒也还没有我预想的那么不堪地new age。还行。
