The manual teaches group leaders how to effectively and successfully administer Wexler's internationally-recognized program by integrating cognitive behavioral skills and a client-centered, skill-building approach that emphasizes respect for the offender

himself. Treatment providers will find the open-ended 26-week psychoeducational treatment model packed with new and innovative specific skills-training exercises, handouts, and homework easily adaptable to different settings. Its structured interventions, clear guidelines, and philosophical orientation are neatly presented in five sections: Foundations, Special Program Sessions, Group Sessions: Self-Management, Group Sessions: Relationship Skills, and Standard Forms. The accompanying workbook and the skills learned from the CD-ROM exercises are invaluable take-home resources for the group members, fully engaging the abusive male in his own education and healing process.
